With spring's arrival the busy season is once again upon us. We are pleased to be growing in our special and tri-state area as we create distinctive architecture with new projects in Colorado, Montana, Idaho, Wyoming and California.

We are proud to be an integral part of some amazing and unique developments across the western United States. We are also very proud of our safety accomplishments. Recently Liberty Mutual awarded The Gallegos Corporation its highest commendation, the Gold Award. Prior to The Gallegos Corporation receiving this award, it had not been given to any company for three years.

The Gallegos Corporation's safety record beats the national average by 40 percent according to statistics from the Department of Labor. With a peak workforce of more than 600 employees, the company lost only three workdays due to injuries or accidents from September 2004 to September 2005.

We have worked hard over the past six years to increase safety on job sites with employee safety training programs, controlled material handling, safety incentives and recognition programs, random safety audits and a zero-tolerance culture. Each one of our 300 field employees is essential to the effectiveness of this safety program and we thank them.

Our safety record sets us apart. It is our dedication to creating the finest buildings in the western United States. We work together as a team and we look forward to being a part of yours.

Warmest regards,

Genard G. Gallegos
