The Gallegos Corporation is proud not only to be an industry leader but a leader in promoting community service in the towns that have been so good to our company – Aspen, Vail, Denver, Lake Tahoe, Telluride and Steamboat.

In this issue we highlight a few of the programs that we have become involved with both personally and as a company to help our communities. These are outstanding programs in the non-profit field and we are honored to participate with them in making a difference for all ages. Not surprisingly giving back has rewards far beyond helping out – it brings our employees together and creates a better environment for everyone.

I have always urged all of my employees to become involved in their communities and I am proud when they give some of their personal time to lend a hand. I hope this newsletter inspires you to participate in events that need your time, expertise or resources.

Warmest regards,

Gerald G. Gallegos
