The Gallegos Corporation
10925 Pioneer Trail, No. 2
Truckee, CA 96161
530/550-7287

With more than 35 years masonry experience, The Gallegos Corporation continues to grow as a leader in the construction industry with its expansion into the Lake Tahoe area, California. TGC will provide the stone and masonry work at East West Partner's Northstar project in Truckee. With The Gallegos Corporation's expansion into Lake Tahoe, commitment to its local communities will also deepen.

"It is exciting to move our company forward into new and expanding markets," says Gerald Gallegos, CEO of The Gallegos Corporation. "TGC is has always been indebted to its employees and work force. For more than 35 years, we have supported numerous community events, and we are excited to have the opportunity to become a part of the Truckee region."

Gerald founded the Vail-based the stone masonry company in 1970. By the early 80s, The Gallegos Corporation had grown from a one-man operation into a leader in the masonry industry. Over the years, the company expanded into other trades including plaster/stucco, marble/granite and concrete. As the company grew, Gerald's pledge to support the communities that support him also expanded.

Determined to provide opportunities for youth, especially, The Gallegos Corporation supports a wide range of programs ranging from Little League baseball to educational organizations. Whether sponsoring an up-and-coming rodeo star or helping to implement an after school program for at-risk youth, The Gallegos Corporation knows establishing roots in the community is tantamount to a successful project.

The Gallegos Corporation is currently committed to projects at Northstar through 2007, and that may be just the start of a very long relationship in that region.

Work on the Northstar project includes four buildings to date, ranging from ski-in, ski-out condominiums to 5-star hotels, night clubs and retail stores. The first phase of the project is slated to be complete in the next ten months, ready for occupancy in November 2005, with the other buildings complete by 2007.

"It is very rewarding to be asked to bring other concepts to life in markets throughout the Western United States," Gerald says.

The Gallegos Corporation is headquartered in Vail, Colorado and has offices in Denver, Telluride, Aspen; Sun Valley, Idaho, as well Lake Tahoe, California and Bozeman, Montana. TGC has specializes in distinctive residential

and commercial projects including quality plaster/stucco, concrete/decorative concrete, marble/granite work and stone sales.
