

One Ski Hill Moves Along By Shannon Gallegos

Masonry work at One Ski Hill Place is well under way. The project is located at the base of Peak 8 at Breckenridge Ski Resort, is scheduled to open spring 2010. When it is completed it will include 88 ski-in/ski-out units and 75,000 square feet of skier services. It is being built green using the Green Globes rating system. Juan Ramon Becerra and his crew have recently started exterior stone work, pavers and exterior stone patios and are putting the Gallegos signature on all of this work. We have 16,000 square feet of stone veneer, 23,000 square feet of exterior stone paving, 23,000 square feet of concrete interlocking pavers 5,000 square feet of interior stone veneer and 13,000 square feet of interior stone flooring all to be completed before March 1st, and at an elevation of 9,500 feet, this is not a small challenge!

Division 32 Sees Results for St. Anthony West Hospital By Robert Massey

The St. Anthony West Hospital project in Lakewood started off two months behind schedule, but is now moving along well thanks in large part to the great work by our field crews. The project consists of more than 200,000 square feet of stucco and approximately 70,000 square feet of faux stone, with our scaffold going 120 feet in places to reach it.

The project is going full steam ahead with Miguel Gutierrez as head of the lath crew. He is the first to come across all of the framing problems and come up with a solution to make the lath acceptable for base coat. He has done a great job leading the crew and solving problems with his attention to detail. Awesome job Miguel!

Jaime Luna is head of the base/scratch and finish coat crews. He has done quite well with beating the productions that we have set for him even when the days get long and tiring with pumping many yards of base coat and keeping the finish coat going strong. Excellent job Jaime!

Hector Herrera is head of the faux stone crew. The stone has been a challenge from the start with material issues and sequencing delays, but even with these problems Hector is doing an excellent job with keeping the guys focused. Great job Hector!

The overall project is headed up by Max Sedbrook. He has done a great job overseeing all of the aspects of the job. When he is not at the jobsite some of his favorite pastimes are drag racing and tolerating me. Great job in keeping all of the guys motivated!

Thanks to everyone involved for putting out maximum effort and getting this project off to a strong start.

Employees of the Months

The Employees of the month for October are Jim Heinritz (Division 22) and Herminio Gutierrez (Division 32). Jim and Herminio worked together to run the Highland Courts Rehabilitation, an EIFS and brick restoration and replacement done with J.L. Viele. This was a difficult job due to the fully occupied condos we were re-cladding, the accelerated schedule, and the level of involvement from the

investigative engineers, home owners and general contractor.

Bernie Niznik, VP for Viele stated "I cannot say enough about how well Jim and Herminio did on this job. We had great craftsmanship and hit our schedule, I can't ask for more."

Thank you for all of your hard work, dedication, and attention to detail on this project guys!

Mike Gifford, (Division 31) is September's employee of the month. He always goes above and beyond his job duties, and is willing to help in areas outside of his division with no complaints. He comes up with good ideas and resolutions to situations. Mike is always responsive and has great follow up. He is a leader that is well respected and cares about his employees. He does a great job and it is a pleasure to have such a wonderful team player. Thanks for all of your hard work and great attitude!

Networking Creates New Business By Sam Johnson

Sam Johnson and Scott Christensen continue to spread the word on all the facets of construction that The Gallegos Corporation is involved with. In order to be successful, though, they need your help. "All of our employees need to network with their contacts to get Scott and I in for presentations," Sam said. "The more we can leverage each individual relationship, the more opportunities we can have for new work."

The duo provides technical know-how to general contractors on stucco/plaster specifics as well as masonry techniques for our harsh winters. A few weeks ago they went to Kiewit Building Group in Denver and presented to ten people. "I feel like the group benefitted from the technical education," Sam added.

The goal is to do one to two presentations per month, not only to provide information but to increase our exposure to large general contractors—who hopefully will take our skills, knowledge and expertise into consideration for jobs in our region.

Aspen Masonry's Good Deeds by Jim Bingaman

Aspen Masonry continues to help out throughout the Roaring Fork Valley. Chris Laven, (PM Division 21) helped make Doc Holliday's final resting spot a little nicer. He donated hours earlier this year working on the Glenwood Springs' Linwood Cemetery Trail Head reconstruction. Chris helped with the construction as well as training other volunteers to build stone retaining walls and flagstone paths and decks at the trailhead.

This community project was for the Frontier Historical Society Museum, Elks Lodge and the City of Glenwood Springs. The new trailhead features a deck, red stone retaining walls, a drinking fountain and low-level lighting for those brave enough to visit the cemetery at night... just in time for Halloween!

Aspen Masonry Aids Rotarians

Aspen Masonry was happy to be able to sponsor the Ducky Derby—a key fundraiser for the Aspen Rotary Club. The funds raised help to promote education, health and human services, community building, and recreational/sports activities in the Roaring Fork Valley. Internationally, money is leveraged through matching grants to fund education, clean water projects, critical medical aid such as surgeries, equipment, wheelchairs and prostheses for the disabled, and the empowerment of people through small business development.

Happy Birthday!

Anniversaries!

Karen and Jon Lest (Division 22/32 estimator) are thrilled to announce the arrival of Anica Faye Lest! Their little girl was born on June 14, 2009 at 4:03 a.m. She weighed 8 pounds, 1 ounce and was 20 inches long. Big brother Alex (seen here helping feed the new arrival) is a huge help to his mom and dad. Everyone is doing great!

The ladies can run! On August 8, Marcette Gordon, Lisa Bystrom and Lindsey Kraft completed the Georgetown to Idaho Springs Half Marathon—and looked good doing it.

Pat Dwyer has also been hitting the roads. On August 8, he ran the very beautiful and hilly Crater Lake (Oregon) Marathon. He says his time of 5:34 was "not so good." His daughter Molly ran the last 7 miles with him, which was great fun! Still to com the Glenwood Springs Tri. September 13 and he's looking forward to it.

The annual Kickball Classic took place on August 15 and once again, The Gallegos Corporation had an amazing team. Newcomer Brandi Resa (AP Supervisor) surprised everyone with a double play in the second game and proved her skills with some amazing catches throughout the day. Keith, Brandi, Marcette and Karen held down the infield with the assistance of our all star pitcher, Nacho Gallegos. Ben led the outfield with Rafa, Mario and Roberto. Shannon (team captain) entertained the

Brandi knows more than numbers.

Refs in the catcher position.

We won the first two games of the day (in the rain) but fell short on our afternoon games. Everyone had a great time and the event was a huge success. Shannon and I would like to thank everyone that participated!! The team consisted of Shannon Gallegos, Rafa Hernandez, Mario Becerra, Jose Rivas, Ben Spillner, Brandi Resa, Keith Baker, Roberto Orellana, Karen Baker, Marcette Gordon, Nacho Gallegos and his son.

Karen Baker gets her groove on.

Nacho readies to run home.

Impressive score!

Pre-game meeting of the brain trust.

The Gallegos Corporation's Mission

To finish each job completely with the highest quality and with safety "the first time."

Provide construction and construction management services of the highest professional standard.

Generate profit from these services while adding value to our customers & employees.

Continue to grow as the industry leader.
